CAREER OBJECTIVES

A dedicated Bachelor of Science in Information Technology student seeking an internship opportunity to apply and strengthen technical skills in software development, database management, and IT operations. Experienced in developing academic web and mobile applications, with strong problem-solving, teamwork, and adaptability skills. Eager to contribute to real-world IT projects while gaining valuable industry experience.

EDUCATION

Bicol University Polangui Campus

Bachelor of Science in Information Technology - 4th year

- Current GPA: 1.3 | Academic Honors: President's Lister, Dean's Lister | A.Y.2023–Present
- Relevant Coursework: Data Structures & Algorithms, Database Management, Computer Networks, Web Development, Object-Oriented Programming

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, C#, C++, Python Basics
- **Web Development:** HTML, CSS, Bootstrap, React.js, PHP
- **Backend & Database:** Node.js, MySQL, MongoDB
- **Development Tools:** XAMPP, Cisco Packet Tracer, Visual Studio Code, NetBeans, Figma, Antigravity
- **Networking:** Cisco Packet Tracer**,** Basic Network Troubleshooting

ACADEMIC PROJECT

Veil — Mobile Security Application 2024
UI/UX Design & Security Project | Lead Designer | Bicol University Polangui
• Conceptualized and designed Veil, a personal security mobile application focused on user privacy, threat detection, and emergency response features.
• Led the end-to-end UI/UX design process using Figma, creating wireframes, prototypes, and a cohesive design system emphasizing simplicity and accessibility.
• Incorporated security-first design principles including biometric authentication, encrypted data storage, and discreet alert mechanisms.

Student Health Record & Monitoring System 2025
Systems Analysis & Design Project | Bicol University Polangui Clinic
• Designed a digital health records system for tracking and monitoring student health data, medical history, and clinic visit logs.
• Implemented secure data management with patient confidentiality protocols, user authentication, and real-time health status monitoring dashboard.
• Reduced paper-based record-keeping and improved data retrieval efficiency for the university health office.

K&A Anti-Rabies Vaccine Management & Monitoring System 2025 – Present
Capstone Project | K&A Clinic, Libon | Bicol University Polangui
• Developed a comprehensive clinic management system for K&A Clinic to digitize and streamline anti- rabies vaccine administration, patient records, and appointment scheduling.
• Built an integrated patient-facing monitoring application enabling real-time tracking of vaccine schedules, dose reminders, and treatment progress for improved patient compliance.
• Designed secure data handling for sensitive medical records with role-based access for clinic staff and patients, ensuring confidentiality and regulatory compliance.

TRAINING AND CERTIFICATIONS

- Java Programming NCIII — NRG Info-Tech Institute, Inc. (2026)
- Cisco Networking Academy (2025-2026): Introduction to Cybersecurity, Data Analytics Essentials, Data Science Essentials with Python, Digital Safety and Security Awareness, Computer Hardware Basics, HTML Essentials, JavaScript Essentials 1
- Automated Defense: AI's Role in Proactive Cyber Threat Mitigation (2025)
- AI for Beginners (2025)
- Introduction to Data Privacy (2025)

INDEPENDENT TECHNICAL EXPERIENCE

Administrative Aide II
LGU Polangui I Polangui, Albay I 2025-2026

- Assisted with computer-related tasks, including data encoding, Microsoft Excel, document preparation, and printing.
- Organized and managed digital and physical records, ensuring accurate data management and efficient file retrieval.
